

"Original" FASTWAX[®]™ User Tips

FASTWAX - Your Prescription for "VSD" - Vehicle Shine Deficiency

- * **Shake well before using!** Spray Nozzle will clog with wax and compound if not shaken before each application.
- * Use terrycloth or micro fiber towels. Do not use towels laundered with fabric softener or dryer sheets.
- * FASTWAX can be used on any hard non porous surface. Do not use on fabric or soft surfaces that can absorb the wax. **DO NOT USE on TIRES or Upholstery**
- * To insure a deep gloss finish, wash vehicle before using.
- * Applying additional light coats of FASTWAX will enhance the shine.
- * When removing baked on bugs or bird droppings, spray on a heavy coat of FASTWAX and allow to set for one minute.
- * When removing road tar, grease, tree sap, or pine tar, spray on a heavy coat and allow to set two minutes.
- * When cleaning chrome parts or small parts such as a side mirror spray directly on rag and apply.
When cleaning interior window surfaces spray directly on rag to avoid over spray on upholstery.
- * Use FASTWAX on rims and wheel covers to remove brake dust.
FASTWAX will provide a protective shield, helping to reduce brake dust build up.
- * Use FASTWAX on the exterior of plastic mirror housings to restore the original shine.
- * Use FASTWAX on oxidized head light covers to remove the haze, allowing head lights to shine effectively.
- * Between Applications of FASTWAX, clean surfaces with water only.
- * FASTWAX can be used on cars, trucks, boats, PWC, RV's, motorcycles, four wheelers, airplanes, shower doors and walls, ceiling fan blades, mirrors, range hoods, countertops, glass table tops, windows, chrome trim, accessories, and fixtures.
